

PRACTICE-AREAS

Tax

Our Tax team supports individuals, partnerships, businesses and corporations as they navigate complex and ever-changing tax regulations, whether at the federal, state or local level. Our goal is to become valued partners by working directly with you and the accounting professionals on your team to deliver results tailored to your needs. One aspect that makes us unique is that several of our attorneys are also certified public accountants (CPAs). That means they “speak the language” used by your existing accounting professionals – helping us work with them seamlessly to address issues and opportunities on your behalf.

Our Experience

- **Negotiating with tax authorities** to resolve controversies
- **Litigating tax-related issues** before federal and state courts and tax tribunals
- **Structuring mergers, acquisitions, divestitures** and other business transactions in the most tax efficient manner
- **Developing tax favored structures for family-owned businesses**
- **Assisting nonprofits** in securing and maintaining tax-exempt status
- **Evaluating investments, gifts and estate plans** to determine the tax implications of various strategies
