

This past Wednesday, God's Love We Deliver's Policy & Planning team attended the 2016 Ending the Epidemic Summit in Albany. This Summit brings together HIV/AIDS professionals from all over the state of New York to discuss past accomplishments, current research and future opportunities as we work collectively to end AIDS in our state. We were proud to see several panels focus their discussion toward involving CBO's in the care continuum. In addition, on several panels, a combination of both professionals and actual clients who, themselves, are HIV positive really gave a fuller portrait of the challenges and successes of our goal. We look forward to our continued involvement in the Ending the Epidemic Coalition and to helping plan next year's summit in order to educate the community about the importance of food and nutrition services for people living with HIV/AIDS.
