

## Healthcare Partnerships

God's Love We Deliver serves in the space between hunger and health. As such, we often do not fit the funding criteria for local, state and federal grant programs. To ensure we continue providing for those in need, we engage in innovation with healthcare partners who focus on the same populations that we serve. Some examples of our healthcare collaborations appear below.

## Funding Streams

- 
- 
- 
- 

MetroPlus, Empire BlueCross Blue Shield, Amida Care

### **State-Approved Program for Medicaid Recipients**

+ - MTM for a Minimum of Six Months

Lunch and dinner for seven days of the week for those with severe diabetes, CHF, cancer, HIV/AIDS

## Partnerships with Health Plans

## **Medicaid Managed Long Term Care Partnerships**

Since 2005, we have partnered with Medicaid Managed Long Term Care plans to serve their most at-risk members.

## **Medicaid Mainstream Managed Care Partnerships**

God's Love We Deliver is a NYS Department of Health Tier 1 community-based organization. We support value-based payment (VBP) initiatives for a variety of insurance products by addressing social determinants of health, including food insecurity and malnutrition.

## **Medicare Advantage Partnerships**

Medically Tailored Meals are an optional benefit provided through Medicare Advantage Plans for a short duration either immediately following surgery or inpatient hospital stay or to facilitate lifestyle modifications for individuals coping with chronic illness.

## **Hospital Partnerships: Delivery System Reform Incentive Payment Model (DSRIP)**

The goal of DSRIP is to reduce avoidable hospitalizations for the Medicaid population in New York State by 25%. Access to medically tailored meals is key to accomplishing that goal. God's Love has been part of DSRIP since its inception, with membership in 10 hospital Performing Provider Systems, where we have served as a vocal advocate for the needs of our clients. Through this participation, we are now part of five hospital-based pilots to test the value of medically tailored meals. Here are some examples of these innovative partnerships.

## **One City Health Innovation Award To Address Food Insecurity in the Bronx**

This project develops and tests a coordinated intake and risk assessment tool for food banks, congregate and medically tailored meal providers

## **The Northwell Health Food as Health Program**

The first hospital-based initiative in New York State to comprehensively address food insecurity among patients

## **Mt. Sinai's Nutritional Meal Delivery Pilot Program**

This project involves a three-month meal delivery pilot to provide nutritional meals to high-risk Medicaid patients with diabetes
