
Special Needs Planning & Guardianship

SERVICE | OCTOBER 3, 2017

We address individual family dynamics.

For expertise in the preparation and administration of trusts for the benefit of all types of beneficiaries, we are counsel you can count on. We understand that clients often need advice on how to plan to meet the future needs of children and other relatives who have disabilities or suffer from addiction and provide sensitive advice about the preparation of trusts that protect the funds left for their benefit.

We assist clients with the preparation of trusts for the benefit of surviving spouses, children from previous marriages, minor beneficiaries, disabled beneficiaries receiving government benefits and beneficiaries who lack fiscal competency or maturity. Whether it is addressing the sensitive issues surrounding the selection of trustees and other fiduciaries or designing individualized plans suited to address all types of family situations and dynamics, we have experience that you can rely on.

When needed, our attorneys assist with the implementation of guardianship proceedings to ensure appropriate care and asset preservation for incompetent individuals.
